Introduction of Substation

1.1 Substation	1
1.2 Components of Sub-station	2
1.3 Classification of Sub-Stations	2
1.4 Design	3
1.5 Layout	3
1.5.1 One-line diagram	5
1.6 Switching function	6

Substations

2.1 Step-up Transformer substation	7
2.2 Step-down Transmission Substation	8
2.3 Distribution Substation	9
2.4 Underground Distribution Substation	10
2.4.1 An underground system may consist of these parts	11
2.5 Substation Functions	11

Substation Equipments

3.1 Power Transformers	12
3.2 Potential Transformer	13
3.2.1 Potential transformer	14
3.2.2 Ratings	14
3.2.3 Difference between current transformer and Potential transformer	14
3.2.4 Advantages of Potential transformer	14
3.2.5 Vector diagram for voltage transformer	15
3.3 Current Transformer	16
3.3.1 Graphic symbols of current transformers	17
3.3.2 Current transformer equivalent circuits	18
3.3.3 Vector diagram of current transformer	19
3.3.4 Classification of Current Transformer	20
3.3.5 Optical or digital current transformer	21
3.3.6 Construction of current Transformer	22
3.3.7 Ratings of current Transformer	22
3.3.8 Caution	22
3.3.9 Difference between C.T and Normal Transformer(N.T)	22
3.3.10 Installation of current Transformer	22
3.3.11 Conclusion	23
3.4 Capacitor Bank	23
3.5 Circuit Switchers	24
3.6 Control House	25
3.7 Lightning Arresters	25
3.7.1 SF ₆ Circuit Breakers	27

3.7.2 Vacuum Circuit Breakers	27
3.7.3 Oil Circuit Breakers	28
3.8 Relays	29
3.9 High Voltage Fuses	29
3.10 Concrete Foundations	30
Major elements of Substation	
4.1 Electrical transformers	31
4.1.1 Autotransformer	32
4.1.2 Polyphase transformers	33
4.1.3 Leakage transformers	33
4.1.4 Resonant transformers	34
4.1.5 Audio transformers	34
4.1.6 Instrument transformers	35
Substation Protection	
5.1 Transformer Protection Products	36
5.2 Bus Protection Products	36
5.3 Breaker and Capacitor Protection Products	37
Relay	
6.1 Relay	37
6.2 Basic design and operation	38
6.3 Types	39
6.3.1 Latching relay	39
6.3.2 Reed relay	40
6.3.3 Mercury-wetted relay	40
6.3.4 Polarized relay	41
6.3.5 Machine tool relay	41
6.3.6 Contactor relay	41
6.3.7 Solid-state relay	42
6.3.8 Solid state contactor relay	42
6.3.9 Buchholz relay	42
6.3.10 Forced-guided contacts relay	43
6.3.11 Overload protection relay	43
Circuit Breakers	
7.1 Circuit Breaker	43
7.2 Operation	44
7.3 Types of circuit breaker	45
7.3.1 Low voltage circuit breakers	45
7.3.2 Magnetic circuit breaker	47
7.3.3 Thermal magnetic circuit breaker	48
7.3.4 Common trip breakers	48
7.3.5 Medium-voltage circuit breakers	48
7.3.6 High-voltage circuit breakers	50
7.3.7-Sulfur hexafluoride (SF ₆) high-voltage circuit-breakers	51
7.3.8-Other breakers	51

Isolator	
8.1-Isolator	52
8.2-Types of Isolator	52
8.3-Features and Benefits	53
Lightning Arrester	
9.1-Lightning Arresters	53
Fuse	
10.1-Fuse (Electrical)	54
10.2-Operation	55
10.3-High voltage fuses	56
10.4-Coordination of fuses in series	57
Conclusion	58
References	59
